

# Welcome!

- In this experiment we are looking for neural markers of attention
- You will see 6 locations on the screen, arranged in a circle
- At the start of each trial, you will see one location highlighted with a purple square
- Focus your attention on the location indicated by the purple square
- Keep your attention focused there, until the images disappear and you see a + symbol.
- After that, you will see a purple square at a new location, and you should focus your attention there.
- At the end, there will be a short survey about your experience.

**Experimenter: Ensure data is streaming from actiChamp**
